

User Enhancements – Release 2

Summary of Changes – DLM 380

In our second release of User Enhancements the following changes and new features have been added:

Patient Select Enhancement

- **Communication Details** - Select Patient screen displays: address, home, business, mobile and email details.

Consultation Manager Enhancements

- **Future and Recent Appointments Link** – Now viewed from an icon on the toolbar.
- **Therapy Inactivation/Reactivation** – When inactivating/reactivating therapy, select a pre-defined reason.
- **Therapy Reprint Reason** – When reprinting therapy, select a reason from a pre-defined list.
- **AMS/CMS Prescribing changes** – When cancelling therapy or editing AMS messages select a reason from a pre-defined list.
- **Alphabetical Vision User Lists** – All Vision user lists are now in alphabetical surname order.
- **DXS** – The toolbar can be compacted, leaflets and illustrations can be saved as attachments.

Appointment Enhancement

- **Patient Demographic Details** – Click a patients name in the appointment book to view their demographic details.

Referrals and Correspondence Enhancements

- **Default Referrals Enhancement** – Link a referral template to a default referral.
- **Mail Merge Changes** – From Patient Groups; the letter is filed in Consultation Manager.
- **New Merge Fields** – 15 new merge fields that can be used for referrals, recalls and patient templates eg last smoking record

Registration Enhancements

- **Alternative Correspondence Address** – Correspondence address can now be added in Registration.

Mail Manager Enhancements

- **Appointments Link** – Updated.
- **Bulk Copy Message** – Messages can now be copied to staff groups.
- **Displaying Add Action Screen** – Can suppress the Add screen.
- **Redirecting Messages** – New facility to redirect messages.

Registration Links

- **Quarterly Archive Storage** – The archive location has changed
