

LabelTrace

LabelTrace is a low cost label printing system that allows GPs and nurses to quickly print labels for specimens, request forms and any other document to which patient details need to be added.

“ The timesaving
is dramatic ”

Dr Harry Yoxall,
Medical Secretary,
Somerset Local
Medical Committee

LabelTrace operates using the patient data held within Vision and is available directly from the consulting screen.

Starting with as few as two mouse clicks, it takes only 1-2 seconds for a set of labels to be printed.

You can even design your own labels for mailing, registration and other relevant purposes.

LabelTrace Features

- Missing NHS/CHI/H&C numbers flagged to user
- Operates identically with wide range of clinical systems in primary/secondary care
- Quickest and easiest to use labeling system available
- Prints a variety of labels from perforated labels for tubes to address labels
- Integrated with Vision enabling printing directly from clinical system

LabelTrace Benefits

- Reduces form filling time by as much as 80%, freeing up valuable clinical time
- Avoids sending incomplete critical data to labs reducing errors and duplicate records
- 30 seconds to train a user so minimal training cost
- Patient demographics obtained automatically from Vision hence accurate, quick and complete
- Rapid return of investment - pays for itself in days not years

LabelTrace Appointment Card System

This is a separate application which enhances the existing appointment printing mechanism in Vision. It allows credit card sized appointment cards to be produced with the information shown in clear legible fonts and including logos, practice information and message lines - for a professional look.
