

Off-line Access to Clinical Data

Vision Business Continuity provides off-line access to the practice clinical data in the event that the full Vision system is not available.

Installed on your local desktop, Vision Business Continuity offers the award winning functions of Pocket Vision. This software is not intended to replicate the complete functionality of Vision, but provide access to key clinical data as an 'insurance policy' for your practice. Vision Business Continuity is designed specifically for deployment at Vision Enterprise System (VES) practices.

Prevention screen showing a patient's BMI

Therapy screen displaying drug dosage

History screen showing influenza vaccination details

Features

- Full clinical record available
- Data is presented and organised in a clear Vision 3 style tabbed format
- Full consult and prescribe functions
- Includes full Read and Drug dictionaries
- Records added will be synchronised with the main system
- All data fully encrypted

Benefits

- Full patient information available at all times, never be without the information you need
- No additional keying of information resulting from off-line activity
- Automated upload and synchronisation process
- Easy to learn user interface that is similar to the main Vision system
