

The most efficient way to use Vision!

You can now dictate directly into Vision to create consultation notes and referral letters faster than ever before!

Vision VoiceDictate has been developed to help you reduce turnaround times of documents and quickly create more detailed consultation notes. You now have the opportunity to work much more efficiently, saving you and your practice valuable time and resources.

Benefits

- Detailed consultation notes can be created in less time
- Referral letters can be produced faster
- Documents can be produced immediately by GP's resulting in reduced turnaround times
- Minimal set-up allows your practice to reap the benefits immediately
- Compatible with the vast majority of Windows based applications including Microsoft Office

Features

- Dictate continuously and naturally at up to 160 words per minute
- Up to 99% accuracy
- Comprehensive medical dictionary
- Integrated with Vision to allow faster navigation and entry of data
- Can be used via a digital recorder

“ A valuable system which makes completing referrals and report writing quick and easy, freeing up secretarial time for more cost effective tasks. It interfaces excellently with the Vision Clinical System and we will be extending its use within the practice. ”

Dr. Patterson
